Benefits

- Flows freely
- Will not clog pipes
- Does not defat and dry out skin
- Small amount required
- Cost effective

LAN-O-KLEEN PLUS is available in cases of 10-5 lb. bags.

Description

Lan-O-Kleen Plus is a heavy duty granular hand cleaner for use in tough industrial environments.

Lan-O-Kleen Plus is very different from most granular hand cleaners. It combines a natural ground corn cob abrasive with soap and lanolin.

Lan-O-Kleen Plus's corn cob abrasive absorbs oils while the soap loosens greases and other soils from the skin.

Lan-O-Kleen Plus finishes the job by introducing a beneficial emollient to the skin. After cleaning, your hands feel soft.

Lan-O-Kleen Plus does not contain solvents.

Lan-O-Kleen Plus is easily dispensed from a variety of dry soap dispensers. Dispensers are available from PENETONE.

Lan-O-Kleen Plus is recognized throughout the world in the steel, refining, mining, transportation, pulp and paper and other similar industries where nothing less will do.

Lan-O-Kleen Plus is an essential part of quality hand care.

IMPORTANT: Before using LAN-O-KLEEN PLUS, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Sep06)
